# POWER

## CLIENT ALERT

## FEBRUARY/2019

**THE PUBLIC CONSULTATION OF THE FIRST PPP FOR SOLAR POWER IN BRAZIL IS NOW OPEN**

The State Piauí is developing the first Public Private Partnership – PPP – focused on the construction, operation, maintenance, and management of solar mini-plants for the generation of photovoltaic power.

The initiative was created at the end of last year by Superintendence of Partnerships and Concessions - SUPARC and is now under Public Consultation for prospection of potential investors until February 22, 2019.

The consultation also has as purpose to gather inputs on the technical, economic and environmental feasibility studies of the project, which are available to interested parties at www.ppp.pi.gov.br.

The project contemplates the construction and operation of 8 photovoltaic mini-generation systems, from which 80% of the energy consumed by the state public power is intended to be obtained.

Veirano Advogado's Power Practice Area has deep expertise in the Brazilian power sector and its regulation in order to help you with the development and other matters concerning PPPs and solar power generation's projects.
