CLIENT ALERT

OCTOBER/2019

ENVIRONMENTAL: REGISTRATION IN THE RURAL ENVIRONMENTAL REGISTRY ("CAR")

On October 17, 2019, Federal Law No. 13.877/2019 ("Law") was published converting the Provisional Measure No. 884/2019 ("MP") and amending the Forestry Code.

The law foresees that CAR remains mandatory, however there is no deadline for the enrollment.

Owners of rural properties who enroll their real estates with CAR until December 31, 2020 will be entitled to join the Rural Compliance Program ("PRA").

There are no more deadlines for Federal, State and Federal District Governments to regulate the PRA, but in case the State or Federal District Governments fail to regulate the PRA, the rural owner may adhere to the PRA implemented by the Federal Government.

By withdrawing the period to enroll with the CAR, the Law aims to enable environmental compliance of properties that have not yet enrolled with CAR and PRA.

Veirano's environmental team has expertise on the subject and is available to provide further clarification.
