CLIENT ALERT

DECEMBER/2019

ENVIRONMENTAL: FEDERAL AGENCY - NEW ELECTRONIC LICENSING SYSTEM

On December 9, 2019, Federal Environmental Agency ("IBAMA") has published the Ordinance No. 26 ("Ordinance"), establishing the Federal Environmental Licensing Management System ("SisG-LAF"), an online platform to manage the demands related to environmental licensing processes.

The main purpose of SisG-LAF is to improve the process through the automation of services provided by IBAMA.

The SisG-LAF encompasses:

i. Request of Preliminary, Installation and Operating Licenses;
ii. Issuance of Reference Terms for environmental assessments;
iii. Filing of documents in compliance with conditions set forth on the Licenses;
iv. Request of permits issued by IBAMA.

It is important to highlight that the use of SisG-LAF will occur gradually, starting with the requests of Preliminary License, and a schedule should be disclosed by IBAMA for the availability of services.

Veirano's environmental team is highly experienced on the subject and is available to provide further clarification.
